Demystifying Cyber Risk

Date

Tuesday 23rd February 2017

Time

6.00pm - 7.00pm

Speaker

Graeme Newman

Director, CFC Underwriting

Learning outcomes or Lecture review

This lecture by Graeme Newman looks at one of the fastest growing lines of business - Cyber insurance. Following the technology revolution that we've experienced in the last 20 years there is hardly a line of insurance that has not or will not be affected by cyber risk. This presentation demystifies this increasingly important topic and provides an insight into how it can be assessed, managed and ultimately insured. Cyber insurance is one of the hottest topics in insurance right now, yet it is also one of the least well understood. This presentation cuts through the hype and looks at the real drivers behind cyber insurance, what insurers and brokers really need to be concerned about and discusses ways in which the market is likely to evolve over the next few years.

The aims of this event are to:

Provide an overview of the evolution of cyber insurance and assess the current state of the market

Highlight and explain recent claims activity

Demonstrate how cyber risk impacts traditional lines of insurance

Provide practical advice for underwriters and brokers looking to tackle this new area of risk

CII CPD event accredited - demonstrates the quality of an event and that it meets CII member CPD scheme requirements.

Attendance at this event can count towards your CPD hours where you consider it relevant to your professional development needs.
